

My Visit to TwistED Science Melbourne

I am going to TwistED Science.

I'll wait to get my ticket or show my ticket at the front desk.

There are so many things to see and do at TwistED.

Some exhibits will feel soapy or sandy, but I can skip those if I don't like it.

There are some bright lights too, but most areas have gentle, natural light.

Sometimes I will need to wait my turn.

I will walk at a safe speed while I am at TwistED.

All the exhibits are safe to touch, but I will be gentle with them.

There are safety fences around each exhibit area to make sure I don't get lost and my adult/s always know where I am.

If I want more information about the science I can ask my adult to scan the QR codes with their phone.

If I am doing a workshop or attending a party, I will go upstairs (or via the elevator) to one of the labs.

If I need help, the staff are very friendly and kind. They are wearing coloured hats and black clothes.

If I need a break I can ask to go to the sensory room, which is a calm and quiet space.

Twisted Science is so much fun!
